

CITY OF HENDERSONVILLE
ASHE STREET NEIGHBORHOOD AND 4TH AVENUE WATER AND SEWER REPLACEMENT

ADDENDUM NO. 2

April 24, 2024

The attention of all Bidders is called to this Addendum No. 2:

Question:

What are the regular working hours for this project? Will the city require night work for this project? Would it be possible to perform night work if preferred by the contractor?

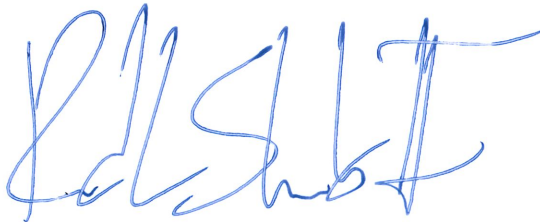

- 7.03 C on PDF page 103 of the project manual in the Supplementary Conditions of the Construction Contract states that "Work at the Site will be performed during regular working hours, Monday through Friday." SC-7.03 on PDF page 175 of the project manual in the Supplementary Conditions of the Construction Contract, modifies 7.03 to define normal working hours to be 7am to 5pm.

Regular working hours for this project will be Monday through Friday 7am to 5pm.

- The city does not anticipate requiring night work as part of this project. The entire scope of the project is within city streets which can have traffic control during the day.
- It is a priority of the city to reduce and mitigate construction related disturbances to residents impacted by this project. These disturbances could include, but are not limited to, bright lights, vibration, construction noise, unusual traffic patterns, or any disturbing activity related to construction outside of regular working hours. After a careful review by city staff, and consideration for residents' wellbeing, the city could authorize work outside of regular working hours if necessary to achieve project goals.

Each bidder is required to acknowledge receipt of this Addendum No.2 in the space provided in the Bidding Documents.
